PROFILE

Software development has allowed me to express my creativity by building applications from scratch. I love the learning and problem solving process by meeting with my team to brainstorm solutions for our projects.

PROJECTS

POTTY PAL

CAPSTONE PROJECT

🔗 <https://github.com/Kazathur92/Potty-Pal>

Potty Pal is a web application that allows users to find the nearest restroom. This Application was developed using an npm package that utilizes the Google Maps Geolocation Api. In addition, through an npm package of the Google Maps Geocode Api this app gives users the option to add their own restroom markers just by simply typing the name of the place or using their current location.

Potty Pal was built in Javascript using the React.js framework along with the following technologies: HTML5, CSS3 and Bulma.io.

POKEMASTER

CAPSTONE PROJECT

🔗 <https://github.com/Kazathur92/Pokemaster-front-end>

Pokemaster is a web application that was developed to be a companion to the Pokemon Trading Card Game. It helps players make and organize their decks. Pokemaster uses the pokemontcg.io API to retrieve information about the cards and then makes a representation of that card that the users can interact with. Pokemaster is a full stack application that uses a back-end server that then passes the data on to the client side. The back-end server is built with Python and Django, and the client side was built using Javascript with React.js, as well as CSS and bulma.io for styling.

EDUCATION

NASHVILLE SOFTWARE SCHOOL
2018 - 2019

NEW START SCHOOL (CNA CERTIFICATION)
2015

THE UNIVERSITY OF TEXAS RIO GRANDE VALLEY
2013 - 2015

SOUTH TEXAS COLLEGE
2011 - 2013

SOFTWARE EXPERIENCE

NASHVILLE SOFTWARE SCHOOL | OCTOBER 2018 - MARCH 2019

Six months of intensive software development training separated into two parts.

BANGAZON 3/BANGAZON REST API - COLLABORATION PROJECT

🔗 <https://github.com/blathering-barnacles/Bangazon-3>

The purpose of this project was to build a REST Api using the Django Rest Framework that holds the database from the other Bangazon projects. Additionally as part of the project we built a simple front-end application to consume it. This is a full-stack application using Python/Django, Django REST Framework, and Javascript/React.

BANGAZON 2/ECOMM - COLLABORATION PROJECT

🔗 <https://github.com/blathering-barnacles/Bangazon-2>

Ecomm simulates an electronic market that allows users to sell and buy products, as well as adding payment types and being able to edit their settings. The focus of this application was to acquire and modify data using raw SQL queries. My role was to build a search bar that would check the database for anything that contains the word which was typed. Also a drop down displaying all the categories, when a category is clicked a url displays the name and all the items of that category.

This App was built using Python with Django as a framework, and Bootstrap for styling.

BANGAZON/WORKFORCE - COLLABORATION PROJECT

🔗 <https://github.com/blathering-barnacles/Bangazon>

The focus of this project was to develop an App that would allow an Employer to better keep track of his/her company by being able to view, add, and delete employees, departments, and training programs. My role was to allow editing, and deletion of the selected training program, as well as a detail view of the selected department.

This App was built using Python with Django as a framework.

NUTSHELL - COLLABORATION PROJECT

🔗 <https://github.com/Team-Acornucopia/Nutshell-React>

This Application is a collaboration project, the focus was to develop an App that would allow the user to share articles, messages, tasks, and events with his/her friends. My role was to allow users to add, edit and delete their shared tasks in the tasks section.

This App was built using Javascript with React.js as a framework.

OTHER EXPERIENCE

TELEPERFORMANCE | 2017-2018

CUSTOMER SERVICE REPRESENTATIVE

The company specializes in outsourced omnichannel customer experience management, also known as Business Process Outsourcing (BPO).

- Promoted business as superior provider committed to efficiency and accuracy when engaging with customers.
- Recommended alternative items when product was out of stock.
- Answered customer's questions clearly and thoroughly.

FERNANDEZ CARE LLC | 2015 - 2017

CERTIFIED NURSE ASSISTANT

- Administered patient's medications at appointed time by R.N
- Assisted the clients with their daily living needs including feeding, bathing, and ensured that the client's safety necessities were met.
- Monitored fluid outputs, documented results and collected specimens for testing.
- Performed patient assessments, documented vital signs and reported changes to supervisors.
- Tested and recorded blood glucose levels.
